## **DETAILED ACTION**

### ***Introduction***

1. Applicants' amendments and remarks filed on 5/19/2008 and 6/1/2007 have been entered. The specification has been amended. In the amendment filed 6/1/2007, claims 1-4 have been cancelled, and new claims 6 and 7 have been entered. Claim 5 has been previously withdrawn.
2. It should be noted that the amendment filed 5/19/2008 contains documents (Serial No. 29/210,361) unrelated to the instant invention, they have not been entered. Applicant's attorney should check the status of the unrelated application, and make proper correction.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. In response to the amendments, the Hawley reference has been withdrawn, and to be reinstated, if appropriate. Rejections not maintained are withdrawn.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:  

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 6 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

More particularly, claim 6, line 3, the phrase “a lower film formed of polyvinyl chloride reinforced with non-woven polyester fibers” is new matter, because the original specification and Fig. 3 disclose a laminate of a lower layer comprising a non-woven 3 saturated with foamed plastisol 4, an adhesive film 7, and a flexible top decorative film 2 [0025]. Applicant must cancel new matter or point out express support in the original specification for the limitation in the next reply. Applicant is reminded that related new matter in amended specification must be also cancelled accordingly.

7. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

More particularly, in claim 6, lines 4-5, the phrase “the non-woven polyester fibers being saturated within the foamed polyvinyl chloride” is vague, indefinite and confusing. The examiner suggests replace the term "within" with --with--, so as to clarify the relationship between the claimed components, as recited in the original specification [0025].

### *Conclusion*

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
